Full screen images

Change log

October 18, 2012 (1.0)

Initial release

Support:

If you need support, please use the contact form on our profile page.

How to use:

We have several samples to use, for use any of them just change the name to '**index.php'**

For change the background images just copy your images into a gallery folder.

To add your logo, just copy your logo in the root directory and name it logo. (jpeg, jpg, png , gif)

And if you don't have a logo you can simply delete the logo image.

And you can change the tab-bar icon in root directory (favicon.ico)

For change any parts of the content just go to the **content** folder ;)
